NARRATIVE

This survey was performed at the request of Mr. Robert West of R.S. WEST REAL ESTATE for purpose of setting selected corners on the MUNICIPAL AIRPORT INDUSTRIAL PARK SUBDIVISION. The corners around the sections were found as shown. These sections were originally surveyed by the General Land Office using the "3-mile method". A search was made for the interior quarter-quarter corners with the results noted on the plat. Several existing centerline monuments were found in the subdivision and used to determine the location of the lot corners which were set.
