NARRATIVE

The purpose of this survey was to retrace a previous survey which was performed in 1990 by Clinton Peatross wherein Mr. Peatross determined the aliquot portions of the Northwest Quarter of Section 25, T3S, R8W. Our survey was for a portion of this Quarter Section which was adjacent to parcels which had been previously staked. Our responsibility was to set the remaining corners of the fractional section owned by the client. The procedure used for determining aliquot parts of the quarter section by Mr. Peatross is consistent with the Manual of Surveying Instructions for Public Lands. Our survey was performed utilizing a Trimble 4700 RTK GPS. We located sufficient corners to reasonably establish a Basis of bearing consistent with the previous survey. The corners found along with the corners set are as shown on this plat.

I, David L. Christensen, do hereby certify that I am a Registered Land Surveyor and that I hold Certificate No. 161249 as prescribed by the Laws of the State of Utah, and that I have conducted a survey of the hereon described property. I further certify that this plat is a true representation of that survey.
