

• indicates 5/8" x 24" rebar with caps set by this survey

NARRATIVE

The sections shown on this survey were originally surveyed in 1883 by the General Land Office. The "Three-Mile" method was used to set interior 1/16 corners. They were later re-surveyed in 1904 using the standard method without an attempt to relocate or set any interior 1/16 corners. The 1904 survey set new stone corners, several of which were found and used by this survey. This survey is based on the later 1904 survey, and has not used the "Three-Mile" method as it was not employed in the later survey.

SURVEYOR'S CERTIFICATE

This is to certify that I have surveyed the parcels of land shown on this plat, and that the monuments indicated were found or set during said survey, and that this plat accurately represents said survey to the best of my knowledge.
