The International Building Code (IBC) 2015 Edition
The International Existing Building Code (IEBC) 2015 Edition
The International Residential Code (IRC) 2015 Edition for One and
Two Family Dwelling and Townhouses
The International Mechanical Code (IMC) 2015 Edition
The International Fuel Gas Code (IFGC) 2015 Edition
The National Electric Code (NEC) 2014 Edition
The International Fire Code (IFC) 2015 Edition
The Utah Wildland-Urban Interface Code 2006 Edition

Note: Utah State has adopted amendments that apply state wide to all of the above listed codes. Some local jurisdiction have also adopted amendments specific to their jurisdiction. To see these amendments go to Utah Code Title 15A. [http://le.utah.gov/UtahCode/chapter.jsp?code=15A](http://le.utah.gov/UtahCode/chapter.jsp?code=15A)

</table>

For SI: 1 pound per square foot = 0.0479 kN/m², 1 mile per hour = 1.609 km/h
S / M = slight to moderate

1. Ground snow load will vary due to elevation. See Utah State IBC amendment 1608.1.1.
2. Duchesne City and Myton City have FEMA flood plain maps available. ([https://msc.fema.gov/portal](https://msc.fema.gov/portal)) The rest of Duchesne County has to be evaluated on a site specific bases.

a. Weathering may require a higher strength concrete or grade of masonry than necessary to satisfy the structural requirements of the codes.
b. The frost line depth may require deeper footings than indicated in Figure R403.1(1) and may be site specific.
c. The jurisdiction shall fill in this part of the table to indicate the need for protection depending on whether there has been a history of local subterranean termite damage.
d. Wind exposure category B, C or D shall be determined on a site-specific basis in accordance with IRC Section R301.2.1.4 or IBC Sections 1609.4.2 and 1609.4.3.
e. The outdoor design dry-bulb temperature shall be selected from the columns of 97 1/2-percent values for winter from Appendix D of the International Plumbing Code. Deviations from the Appendix D temperatures shall be permitted to reflect local climates or local weather experience as determined by the building official.
f. The jurisdiction shall fill in this part of the table with the seismic design category determined from Section R301.2.2.1.
g. The jurisdiction shall fill in this part of the table with (a) the date of the jurisdiction's entry into the National Flood Insurance Program (date of adoption of the first code or ordinance for management of flood hazard areas), (b) the date(s) of the Flood Insurance Study and (c) the panel numbers and dates of the currently effective FIRMs and FBFRMs or other flood hazard map adopted by the authority having jurisdiction, as amended. See Note 2.
h. In accordance with Sections R905.1.2, R905.4.3.1, R905.5.3.1, R905.6.3.1, R905.7.3.1 and R905.8.3.1, where there has been a history of local damage from the effects of ice damming, the jurisdiction shall fill in this part of the table with “YES.”
i. The jurisdiction shall fill in this part of the table with the 100-year return period on national air freezing index (BF-days) from Figure R403.3(2) or from the 100-year (99 percent) value on the National Climatic Data Center data table “Air Freezing Index-USA Method” (Base 32°F).” (Days shown are based off of the Fort Duchesne data)
j. The jurisdiction shall fill in this part of the table with the mean annual temperature from the National Climatic Data Center data table “Air Freezing Index-USA Method” (Base 32°F).” (Temperature shown are based off of the Fort Duchesne data)
k. In accordance with Section R301.2.1.5, where there is local historical data documenting structural damage to buildings due to topographic wind speed-up effects, the jurisdiction shall fill in this part of the table with “YES.” Otherwise, the jurisdiction shall indicate “NO” in this part of the table.
l. In accordance with Figure R301.2(4)A, where there is local historical data documenting unusual wind conditions, the jurisdiction shall fill in this part of the table with “YES” and identify any specific requirements. Otherwise, the jurisdiction shall indicate “NO” in this part of the table.
m. In accordance with Section R301.2.1.2.1, the jurisdiction shall indicate the wind-borne debris wind zone(s). Otherwise, the jurisdiction shall indicate “NO” in this part of the table.
